JUST. EXCELLENCE IN STANDARDIZED LIGHTING TECHNOLOGY.

JUST Normlicht creates optimum conditions for critical color assessment throughout the complete digital workflow – the designer's color monitor work space – the proofer in the prepress area – the final print-out in the pressroom.

JUST Normlicht can offer a light audit for all companies wishing to qualify for the process standardization according to ISO 12647-2. The purpose of the light audit is to analyze and evaluate the lighting environment in all critical work places and an assessment of a printing company's requirements for achieving the ISO 12647-2 certificate.

Just Normlicht welcomes inquiries for a light audit!

Cyan does not always equal Cyan

All JUST Normlicht standardized viewing devices are being tested from 215 test colors (ISO 3664:2009 stipulates only 8 test colors). $CRI_{215} = 95.6$.

Since the year 2000 the viewing standards for the graphic arts industries have been redefined, in order to eliminate discrepancies in color analysis of the printed copy. ISO 3664:2000 called for tighter standards of color viewing booths.

Additionally the new certification for process standardization in offset printing – ISO 12647-2 – has been established enabling individual printing companies to objectively document the quality of its printing production, satisfying the most demanding of customers. ISO 12647-2 has set an authoritative benchmark for analyzing the quality of the complete workflow in print production, of which a major element is a certified, controlled standardized lighting environment.

The complete range of Just Normlicht products fully complies to these new standards.

To comply with the standard, the following 4 conditions must be met at the same time:

1 Light quality

The critical demands of ISO 3664:2009 cannot be met using generic fluorescent tubes. Just daylight 5000 proGraphic tubes however comply with all criteria of the standard:

- Color coordinates, defined as $x = 0.3478$ and $y = 0.3595$, tolerance allowed only 0.005°
- Color temperature 5000 Kelvin (D50), mandatory for all prepress and press activities.
- Color rendering value $R_a > 90$.

To determine the maximum metameric error, the ISO 3664:2009 specifies the metamerism index for the visible spectrum with a value $MI(vis) < 1,0$ and for UV the $MI(uv) < 1,5$.

Because of the use of optical brightener agents metameric failures are happening more frequently because of fluorescents. Just Normlicht products are achieving this requirement for years.

2 The ambient conditions

The ambient conditions in the room greatly affect the color impression. ISO 3664:2009 specifies the surrounding conditions as follows:

- the general room lighting must be shaded and should neither directly nor indirectly influence the viewing surface.

- Walls, ceilings, floors, and other surfaces (incl. clothing) must be a neutral, matte grey with a reflection degree of $< 60\%$. JUST Normlicht equipment provides a far lower reflection percentage.

◀ Viewing slides with darkened frame

3 The brightness and evenness of the illuminated surface

For visual color control a light intensity of 2000 Lux (+/- 500 Lux) is required on the illuminated surface in order to visualize even the slightest color differences.

The comparison of a soft proof with a print or a hard copy proof is specified in ISO 12646. The lighting conditions should comply with all of the requirements of ISO 3664. The luminance level has to be adapted to match the illuminance level of the monitor. The ideal monitor illuminance level is greater than 120 cd/m^2 . JUST Normlicht products featuring the USB control interface can be controlled by a calibration software and monitor calibrator to exactly match them to each other.

4 Preventing shine

Extreme glare and shine on the viewing surface affect critical color assessments and can lead to misinterpretations. Although not even the modified ISO 3664:2009 defines exact conditions to prevent shine, JUST Normlicht creates absolute glare-free properties by its uniquely developed combination of special asymmetrical reflectors and functional design to satisfy the highest demands.

ORIGINAL REPLACEMENT TUBES FROM JUST.

daylight 5000 proGraphic, exclusively designed for JUST, are the only fluorescent tubes worldwide with exceptional standardized lighting quality. Read here for why this is important.

The ISO 12647 standard establishes strict quality parameters throughout the complete digital workflow in the graphic arts industry. Besides existing technical measuring procedures for color control, the visual control of printed products plays a decisive role. This is why standardized light conditions complying with ISO 3664:2009 are fundamental to prevent discrepancies in color assessment.

Choosing the right fluorescent tube is critical to create the right light conditions for color evaluation purposes.

The high quality fluorescent tubes, JUST daylight 5000 proGraphic, create optimum viewing conditions for critical color assessment. The only fluorescent tube on the market that fully complies with the critical demands of ISO 3664:2009 in terms of:

- **Color coordinates**
Tolerance of only 0,005 and an even distribution of spectral lines.
- **Color temperature**
5000 Kelvin and a high color rendering value of Ra8 > 98 (exceeding the established value of Ra > 90).

- **Metameric index**
By far lower than 1.
- **Innovative production process**
The only fluorescent tubes on the market to be produced with a 4-band technology. Light color is produced with 4 different phosphors, thus greatly improving spectral properties.
- **Certified light quality**
Every daylight 5000 proGraphic tube is accompanied by a measuring certificate which verifies its exceptional light quality.
- **No. 1 in environmental awareness**
JUST is again a step ahead when it comes to environment protection: daylight 5000 proGraphic contains less than 5 mg mercury in each tube.

- **Technical consultancy**
Our qualified experts will be glad to evaluate the light conditions in your workplace. **Please inquire!**

For JUST viewing devices with TLSI technology
Automatic warning for relamping after 2500 hours of light bulb use. Green light indicates: up to 2300 hours of use, tubes are within ISO 3664:2009 compliance. Yellow light: Less than 200 hours of use remaining, order replacement tubes. Red Light: Replace tubes!

Relamping
After 2500 hours of service, fluorescent tubes diminish their color temperature. In order to provide consistently accurate and reliable viewing conditions, JUST Normlicht requires relamping every 2500 hours.

For viewing devices with no hour counter simply mark the next date for relamping on the attached label according to the following schedule: Single shift = once per year, two shifts = every 6 months, three shifts = every 4 months.

For viewing devices with hour counter simply mark the time limit on the attached relamping-label by adding 2500 to the number of actual service hours.

Certified viewing conditions – made by JUST.
Spectral light distribution with a new, improved UV-content

Test protocol reveals that the fluorescent lamp JUST daylight 5000 proGraphic fulfills the strict criteria for standardized lighting according to ISO 3664:2009.

COLOR FRAME

The low cost entry into the standardized lighting technology – new design and easy to use, with superior illumination: JUST colorFrame: Ideal for photographers, advertising agencies and prepress studios.

Available in two sizes, with magnetic rear wall and optional dimmer for soft proofing applications.

COLOR FRAME 02
COLOR FRAME 02

Functional "laptop" design with convenient operation: foldable lamp with built in carrying handle for easy transportation, worldwide use with multi-voltage ballasts, optional dimmer for soft proofing applications.

| Item No. | Type | Worksurface (H x W cm) | Outside dim. (H x W cm) | Watt |

TRANSPARENCY FLAT VIEWERS

Smart Light 5000

JUST Normlicht's price-attractive flat viewer in five different sizes for every type of application.

Color Control Classic Line 5000

The top of the line viewers are equipped with an electronic slide dimmer and available in 7 sizes. Features include electronic, instant start ballasts, infinite dimming, flicker free operations, and extremely uniform illumination. Suitable for reproducing transparent artwork and digitalizing slides by scanner.

| Item No. | Type | Light area (D x W cm) | Outside dim. (D x W x H cm) | Watt |

COLOR COMMUNICATOR

JUST colorCommunicator is the world's first viewing booth that communicates via the JUST USB interface with a monitor calibration software to precisely match the softproof on the monitor and the hardcopy in the viewing booth.

The software: adJUST monitor calibration
Based on the award-winning monitor profiling solution basiColor display, the adJUST monitor calibration software makes it possible, for the first time, to precisely calibrate the intensity of the standardized lighting along with the monitor and to test the results for continued accuracy. Possibility of measuring and assessing ambient light and viewing booths (with compatible instruments) according to ISO 3664:2009 and ISO 12646.

Devices with the JUST USB Interface are equipped with a digital display for brightness control and hour meter for the next tube change.

COLOR VIEWING LIGHT

Pantone® Color Viewing Light provides consistent criteria for visual quality control with up to five different illuminants.

The continuous tube monitoring and convenient warning of necessary tube changes guarantees consistent viewing conditions.

Color Viewing Light Item No. 521
Type PJC / CVL 5 E

Color Viewing Light Item No. 737
Type PJC / CVL 3

Outside dimensions:
W 68 cm, H 46 cm, D 42 cm
Usable space:
W 65 cm, H 38 cm, D 36 cm
With 3 different light colors.

Replacement bulb set
Item No. 1719

PANTONE® is a registered trademark of Pantone, Inc.

Outside dimensions:
W 68 cm, H 51 cm, D 42 cm
Usable space:
W 65 cm, H 38 cm, D 36 cm
With 5 different light colors.

Replacement bulb set
Item No. 1198

The 5 adjustable light sources:

- 1** **D65** North sky daylight, conforms to all important international regulations for visual color matching (CIE D 65)
- 2** **D50** Daylight for color matching in the graphic arts industry. For reproductions and color proofs (CIE D50, ANSI PH 2.30, ISO 3664)
- TL84** Typical lighting for stores, offices, supermarkets and exhibition halls
- A** Typical incandescent for homes, offices or hotels
- UV** Required for textile or paper industries, stimulates optical brightness, whitening agents, fluorescent pigments

We are connected!

Leading manufacturers rely on JUST Viewing Booths with USB interface.

LED TECHNOLOGY

Precise, controllable lighting conditions for an exact match between a proof or original samples – important in many industries such as, textiles, plastics, automotive, furniture and graphic arts to ensure reliable color decisions.

JUST Normlicht has developed a multispectral LED illuminant (Pat. pend.) that is able to reproduce many different light spectrums with great accuracy. In addition to the standard illuminants D50, D65, A, C, D55 and D75, virtually any other light source can be simulated in with excellent quality – The unique JUST LED calibration method (pat.pend.) guarantees consistent spectral properties for sophisticated industrial applications for many years.

LED colorControl

The multi-spectral LED technology provides a perfectly controlled lighting environment for the visual comparison of an original or a proof and a production sample.

With JUST LEDcontrol any light source is controlled in an excellent quality.

LED COLOR CONTROL

LED COLOR VIEWING LIGHT XL HYBRID

Perfect creation of multiple light spectra for immediate recognition of metameric failures.

LED Color Viewing Light

LED Color Viewing Light has the ability to simulate and program any conceivable lighting environment: In addition to the standard illuminants D50, D65, A, C, D55 and D75 virtually any other light source can be simulated with excellent quality. The multi-spectral LED even includes the proper UV content to show fluorescence (OBA's). In the hybrid model metamerism caused by mercury peaks can be identified by using three additional TL84 fluorescent lamps.

LED COLOR PROOF LIGHT XL HYBRID

LED control software professional allows the selection and reproduction of any light source – standard illuminants such as D50, D65, A, C, D55, D75 but also any other light source – free choice of color temperature or chromaticity coordinates out of the available gamut. The selected illuminant can be saved and recalled at any time with consistent spectral properties for years.

LED Color Proof Light

The proof light hanging from the ceiling has the ability to simulate and program different light sources to illuminate larger areas – in the meeting room as well as in the laboratory. In the hybrid model, metamerisms caused by mercury peaks can be identified by using three additional TL84 fluorescent lamps. For larger areas multiple lamps can be easily connected together and controlled by one computer and software.

COLOR PROOF LIGHT

JUST proof lights guarantee precise color control with efficient lighting technology and asymmetrical light control – at the press as well as in the prepress studio.

Equipped with JUST daylight 5000 proGraphic ISO 3664:2009 fluorescent lamps, 6500K lamps are an available option.

Electronic ballasts*: instant start, extended tube lifetime, flicker-free, eye-friendly operation, low power consumption.

Color Control Professional
digital hour meter

Asymmetrical light design prevents glare and distracting reflections on the printed sheets.

CONTROL STATION CTP PRO

Control Station CtP Pro – makes spot checks of CtP- and conventional Offset Plates more efficiently and safely.

Today, quality control becomes much more important during all digital prepress steps, especially with the process of computer to plate. The printing plate is the last and sometimes the only visible hardcopy that can be checked before starting the printing press.

- Comes with an asymmetrical proof light for even illumination of the plate
- Vertical control panel allows comfortable and easy positioning of plates
- Magnifying glass with comfortable hand rest support
- Magnifying glass moves smoothly in vertical and horizontal directions
- Manual height adjustable plate board for comfortable working in upright position
- Adjustable slanted plate board can be used for color matching of press sheets under standardized lighting conditions.

With the wide-field lens a fast and secure control of the printing plate is assured.

MODULIGHT

If you have a small meeting room or a complete print shop the moduLight is flexible enough to fit into every room situation and creates standard lighting conditions where ever they are needed.

moduLight 01

Single module used to illuminate smaller areas on the work desk in meeting rooms at publishers and ad agencies, prepress studios and copy shops.

moduLight 02

Combination of two modules for use in meeting rooms, reception areas, customer lounges and linear applications adaptable to every need.

moduLight 05

Combination of five modules designed to illuminate an area of 70 x 100 cm exceeding all of the requirements of ISO 3664:2009.

Color table according to DIN 5033 with Planck curve.

JUST moduLight has not only met the ISO 3664:2009 specification but has exceeded the standard by:

- a lumination quality with tightest chromaticity tolerances of 0.005 a color temperature of 5000 Kelvin a CRI – Color Rendering Index >90 at approx. CRI = 97
- a luminance level of 2000 Lux (+/- 250 Lux) on the viewing surface
- an even distribution of the light and a glare and shadow free viewing environment

Suspension from ceiling with an innovative, height adjustable steel cable system, suitable to the modern design of moduLight.

TLSI Technology – integrated LED field with easy to understand signal technology. Automatic warning for relamping after 2500 hours of light bulb use.

Digital dimmer with USB interface and software adJUST monitor calibration for softproof-on-press applications (optional).

WALL ILLUMINATION

Wall Illumination is the professional JUST solution for large format viewing walls – with magnetic back drop, suitable for advertising agencies, photographic and prepress studios, and large format printing applications.

Thanks to the JUST moduLight technology an even illumination of the viewing area in compliance with ISO 3664:2009 is guaranteed.

Wall bracket for moduLight is optionally available.

| Item No. | Type | Outside Dimension (L x W x D cm) | Illumin area (H x W cm) |

| 104844 | Wall Illumination 5/58 160/80 SP | 163.5 x 77.5 x 8.5 | 140 x 80 |
| 105155 | wall bracket 5/58 | | |

SOFTPROOF ON PRESS

Soft proofing at the press console.

At the press console there are two problems for softproofing:

1. Disturbing influence of ambient light
2. The size of the press sheet doesn't fit the monitor

JUST offers customized and modular solutions to printers to retrofit existing press consoles.

Custom-made control center housing.

Representation of an entire press sheet on multiple monitors.

The "Scroll" solution: movable monitor with position sensor for displaying zone by zone areas of the press sheet.

Customized soft proofing on press solution: To control the disturbing influence of ambient light JUST provides individually developed press console enclosures which are either mounted directly at the console or free standing around the console. Sheet format – screen size: JUST is offering two approaches: 1. For the use of multiple monitors side by side in order to display the complete sheet size at a glance JUST provides a stable crossbar with multiple VESA monitor mounts. 2. Some softproof software solutions are supporting the "scroll" version: where a monitor is moved on a "tracking rail" zone by zone, back and forth. The built-in position sensor enables the display to show the exact detail of the press sheet where the monitor is positioned.

PROOF TOP MULTI 5000

Visual color matching for small sizes up to 50 x 70 cm. The multifunctional JUST Proof Top Multi, with its compact size fits easily into any publishing or prepress environment.

Whether as a freestanding, mobile viewing booth or in the desktop version, the Proof Top Multi is a flexible and practical solution for the presentation and evaluation of layouts, proofs, or prints.

Asymmetrical proof light for glare and shadow
free illumination of the work surface and rear wall.

Proof Top Multi
Freestanding version, floor stand with wheels.

Side walls
for ambient light control (optional).

CHALLENGE 5000

Visual color matching in 70 x 100 and 100 x 140 cm sizes. The viewing booth for the presentation and visual control of layout, proofs and press sheets for advertising agencies, publishers and prepress studios.

Side walls
for ambient light control (optional).

Challenge 5000
Asymmetrical proof light for glare and shadow free illumination of the work surface and rear wall.

COLOR PROOF STATION

Color Proof Stations have been used for decades in quality control for printing. Forward-looking light-technology for all print sizes (20 x 28" to 47 x 63") and numerous trim levels provide a perfect, comfortable quality control of proof and production printing.

Color Proof Stations are equipped with JUST daylight 5000 proGraphic ISO 3664:2009 fluorescent tubes, 6500K is available on request.

Color Proof Station 0B/3B in 3 standard versions

PROOF STATION

JUST Normlicht proofStation is setting new standards in design, functionality and innovative lighting technology.

A new color quality control system of exceptional style and design, providing even light distribution and a glare and shadow free color viewing environment.

proofStation SP versions are equipped with digital dimming and JUST USB interface for soft proofing applications.

The proofStation SP versions are also equipped with a monitor bar and standardized VESA mounting for each LCD Monitor up to 30". Mounts for larger monitors are available on request.

Keyboard holder (optional)

Side walls for ambient light control (optional)

VIRTUAL PROOF STATION

Soft proofing is coming to the pressroom! JUST Virtual proofStation is the first press side viewing station that offers the unique computer controls to create an exact viewing environment match between monitors and press sheets.

Saves time and reduces costs with improved communication and coordination in the color decision process.

Virtual Proof Station includes the JUST USB Interface, a VESA monitor mount, ventilated computer cabinet and a keyboard and mouse tray. Built-in side walls and movable wheels make the Virtual Proof Station a complete solution for the soft proofing workflow.

Virtual Proof Top is the desktop version for space-saving integration into an existing viewing area.

The Virtual Proof Station is equipped with the latest, cost-efficient soft proofing on press technology and offers ISO 3664 compliant viewing conditions.

| Item No. | Type | Outside Dimensions (HxWxD cm) | Viewing area (WxH cm) | Watt |

TRANSPARENCY / LITHO LIGHT TABLES

JUST Litho Light Tables for retouching and cutting purposes. Ergonomical design and flexible handling ensure efficiency.

Transparency light tables are dimmable 500–5000 Lux. Equipped with non-reflective acrylic light diffusers and state-of-the-art lighting technology, they offer the ideal solution for color assessment of transparencies and films.

Standard ST
manual height adjustment

Vario HO
spring loaded height adjustment

Vario SV
spring loaded and 85° slope adapter

Litho Light Tables

For cutting, pasting or retouching, with scratch resistant surface. Light intensity 3500 Lux for comfortable working.

Transparency light tables

Complies with the standard of 5000 Kelvin in slide evaluation. With non reflective acrylic surface, even illumination and high light strength.

Litho Light Tables large Format

Item No. 23523

Upon request: Custom tailored light tables available formats up to 153 x 250 cm.

GL OPTIC SPECTRAL LIGHT MEASUREMENT

The right tool for light assessment as required by ISO 3664:2009.

Starting in 2009, under the brand of GL Optic, JUST has developed and distributed a complete line of precise light measuring devices. Recently introduced the GL Optic MINI spectrometer measures light according to the ISO 3664 standard. This high-quality, easy to use device gives you everything you need for reliable, consistent light measurement. The device is immediately ready to use once it is connected to your Windows PC. Thanks to its high sensitivity and accuracy, it is the ideal solution in for accurate light measurement.

GLspectrosoft is an intuitive software for complete evaluation of the measured spectra according to all applicable standards, such as ISO 3664:2009.

GLspectrosoft is laboratory software for complete spectral analysis. It is intuitive and easy to use software that offers many possibilities.

Item No. 102095

GL Optic MINI spectrometer
An easy to use light meter with unprecedented performance in this class of spectral measurement devices.

Item No. 67827

GL Optic display sensor
For monitor calibration, contact or distance measurements.

Item No. 93047

Features:

- High sensitivity and precise calibration
- Low noise and stable measurements
- Ready to work when connected to PC after approximately 10 min
- Small size and low energy consumption
- Powered via USB connection

Applications:

- ISO 3664:2009 compliance test and audit
- Measurements of different light sources: halogens, fluorescent lamps
- LED measurement
- Display measurement

STUDIO LIGHT SYSTEM 5000

JUST Studio Light Systems offer a complete solution for digital and analog photography. Fully equipped with flicker-free daylight lamps in a large format yet compact design. The ideal tool for "inhouse" photography.

The entire studio offers the user a complete solution, quick set-ups and an efficient working environment. The studio is ready in minutes and completely equipped with 3 lamps that are variably adjustable on mobile support arms. The studio surface is equipped with dimmable transmissive lighting. Worksurface height 32 1/4". Complete studio, including 3 lamps (2x/4x/6x55W) and backdrop. Please ask for further information.

Camera Holder with swivel arm

Optional Camera Holder and swivel arm for stationary pictures without tripod.

Item. No. 8243

Laptop Holder with swivel arm

Optional Laptop Holder and swivel arm for immediate control of your set from your laptop display.

Item. No. 13094
